

## **MINDANAO STATE UNIVERSITY - MARAWI FACULTY AND STUDENTS VISIT NIP**

### **MINDANAO STATE UNIVERSITY MARAWI FACULTY, RESEARCH FELLOW, AND STUDENTS WITH CONDENSED MATTER PHYSICS LABORATORY MEMBERS**

Project: CHED-LAKAS-2021-010 “Chemical and Environment: Portable Sensors and Transducers Phase 2 (CE-PoS<sub>T</sub>2)”

Host Professor: Dr. Arnel A. Salvador (CMPL)

Duration: 12 to 20 December 2022

Visiting Faculty and Students from MSU Marawi:

Dr. Johnny Jim S. Ouano (Project coordinator)

Clarisse Jade T. Estrada (Research fellow, MS Physics student)

Sunny John A. Lood (MS Physics student)

Zharah M. Zapanta (MS Physics student)

Jose Andrian P. Saspa (MS Physics student)

Students and faculty from the Mindanao State University visited NIP, in line with the CHED-LAKAS project entitled “Chemical and Environment: Portable Sensors and Transducers Phase 2” or CE-PoS<sub>T</sub>2. The MSU students were trained by members of the Condensed Matter Physics Laboratory in device fabrication processes, such as photolithography and metal deposition, and in x-ray diffractometry characterization. Their training will be vital when they establish their respective device fabrication laboratory in their home institute.
