

NIP Vision and Mission Statements

NIP Faculty Workshop

(Laiya, Batangas, 31.July - 02. August 2014)

NIP Executive Council meeting

(NIP A201, 29.September 2014)

Our VISION is to be the leading center of physics education and research in the Philippines which, through the generation of new knowledge in pure and applied physics, would exert scientific influence in the Asia-Pacific region.

As the leading center of physics education and research in the Philippines

- To produce a significant number of excellent PhD graduates in pure and applied physics
- To attract and retain the best scientific talents
- To develop and disseminate evidence-based programs and materials in physics education
- To develop and maintain enabling and nurturing environment for researchers, faculty, students, and staff by offering a competitive compensation package and by promoting intellectual honesty, integrity, collegiality and academic freedom

As a center that generates new knowledge in pure and applied physics

- To increase the production of high-impact research by developing patentable technologies and by acquiring and maintaining state-of-the-art facilities in the level of international standards
- To achieve fiscal sustainability in funding research endeavors
- To encourage activities that support entrepreneurial and industrial application and development

As a center that exerts scientific influence in the Asia-Pacific region

- To inspire the general public into appreciating the societal value of physics by increasing public visibility and solidifying the center's reputation as the premier physics institution
- To work with stakeholders in the public and private sector by actively engaging with policy and decision makers
- To foster international cooperation and academic exchange by adopting leadership positions in the multi- and interdisciplinary research efforts in solving national and regional concerns
